Thought Note

First of all, I enjoyed completing the capstone project. Using such advanced tools and techniques was a thrill experience. Learnt a lot of new things from the project. First off all was patience, second was problem solving, etc.

It took me almost 10 days to complete the project. I tried my level best to make the whole project responsive and got fair results too. I hope the instructor who checks the project would also find my work professional. I avoided using AI tools for making the project except for using carousel, I had to use chat gpt to help me in making the carousel as I was unable to do it myself.

All the pages are designed as per the requirements asked in the capstone project question pdf. I was unable to arrange all the pages in folders as it gave too many errors while I was doing so after I completed the whole project. I hope you would forgive my mistakes this time and give descent grades. I promise to work upon my flaws from the next project onwards.

Thanks and Regards,

Aviraj
